Safety Solutions is the only US racing equipment supplier dedicated to developing and improving the entire line of Safety Products through the use of Sled testing. No other US restraint system manufacture does more Dynamic testing than Safety Solutions, Inc.

Safety Solutions line of Driver Nets are being used by top NASCAR Winston Cup Teams, Factory Sports Cars for GM and DaimlerChrysler, in USAC Silver Crown Cars and Sprint cars.

The Driver Nets were Engineered by Safety Solutions to be in the correct place to help control occupant movement and enhance your Safety System. Engineering that only comes from a company devoted to Lab testing to make our products Superior.

Lab tested by GM Motorsports and Autoliv North America, these nets provide Proven Performance both in the lab and on the track. All nets feature the highest quality materials and construction and are equipped with a Quick Release mechanism to insure a fast exit. The construction of the nets helps to provide a smooth surface for the helmet to slide against.

Safety Solutions Driver Nets also strengthen the headrest and shoulders of the seat system and help guide the occupant back into the seat system during an impact.
